

Accelerate Technology Increases Flexibility in Gas Supply

Accelerate Deepwater Ports

- Gulf Gateway (USA)
- Northeast Gateway (USA)

Accelerate GasPorts

- Teesside GasPort (UK)
- Third party GasPorts in Bahia Blanca (Argentina) and Kuwait*)
- German GasPort (development underway)

Ship to ship transfer (STS)

- Transfer between conventional and Accelerate ships is possible

- Main assets: two US offshore deepwater ports (ca. 10 bcm/a capacity); GasPort in UK (ca. 4 bcm/a capacity), a fleet of currently six LNG vessels with ca. 4.8 bcm/a transport capacity, third party GasPorts
- Other import projects under development utilising these technologies
- Discharge of LNG at conventional import terminals also possible

*) to be commissioned in 2009.
